## ABOUT ME

Hi there, I am Md Nazmus Sakib Shafin

A passionate Front End Web Developer. I would love to share my expertise and experience to contribute your next project. I am a beginner level front end web developer and my experience in this field for two years and I am still learning about that and I just want to say that coding is just not my passion it's my dream, it's my emotion and it's my one kind of soulmate after all. So, now I will tell about my journey of my coding career like from where I start and where I get in this position right now. At first I learn HTML, then CSS, then I css framework which name is Bootstrap, and then I learn JavaScript, then I learn js library React.js in the running time of learning react I just fall in love with that and after that I went too much familiar with Tailwind CSS and the component library Daisy UI, Flowbite and others. But I know little bit of Backend code with Node JS, Express JS and with the Database as MongoDB. So this is my little bit 2 years of journey of my coding life but yeah knowledge has no limits so I am learning more and more.

## WORK EXPERIENCE

### Front end Web Developer

2022 - Present

I started learning the basic web development course for front end since 2022 and I captured many skills to provide best solution of front end development. Mainly I am expert with React JS and Tailwind CSS and the component library of Tailwind CSS like Daisy UI, Flowbite and others.

## SKILLS
